
School Year 2025/2026

Lesson Plan

Theme:

Cycle	Year	Organizing Theme	Essential Learning
2nd CEB	6th	Data organisation and processing	Collect, organise, and represent data. Interpret information represented in different types of graphs. Express reasoning, procedures, and conclusions orally and in writing.

Objectives:

Objective: Collect data on the consumption of seafood among students.

Content:

Sample, data, population, graphs.

Methodology:

Creation of a simple questionnaire with questions such as:

- **How many times per week do you eat fish or seafood?**

- **What is your favourite seafood?**
- **Do you know where the fish you eat comes from?**
- **Do you think it is important to protect the oceans?**

Activity:

Data collection at school

Data processing:

- **Absolute and relative frequency tables.**
- **Bar charts, pie charts, or pictograms.**
- **Calculation of the average weekly consumption.**

Discussion of results:

- **What do the data reveal about eating habits?**
- **Is there a relationship between consumption and environmental awareness?**

Assessment:

Construction of graphs and data analysis.
